Managing sales reports

The Portal gives a broad range of reports through which you can view the activities of your company.

Sales reports

The sales reports are grouped into the following areas.

Ledger and cashbook reports:

Use these reports to examine your ledger and cashbook activities.

- *Account report* on page 199.
- *Cashbook Statement report* on page 202.
- *Ledger Balance report* on page 206.
- *Ledger Balance Detail report* on page 209.
- *Ledger report* on page 212.

Balance reports:

Use these reports to examine your account, tender and GST balances.

- *Journal List report* on page 9.
- *Missing Journal report* on page 15.
- *Site Banking report* on page 18.
- *Site Cashups report* on page 21.
- *Site Balances report* on page 24.
- *Site Tenders Summary report* on page 27.
- *Terminal report* on page 215.
- *Tender Balances report* on page 285.
- *GST Balance Position report* on page 149.

Sales reports:

Use these reports to examine sales across brands, departments, states, sites and the effectiveness of advertising campaigns.

- *Advertising Group report* on page 251.
- *Advertising List report* on page 262.
- *Comparison of Advertising Sales report* on page 254.
- *Comparison of Advertising Sales report* on page 258.

Managing sales reports

- *Brand Sales report* on page 306.
- *Sales Grid report* on page 311.
- *Comparison / Pivot Table Sales report* on page 281.
- *Department Sales report* on page 317.
- *Department Summary report* on page 225.
- *Department Tenders report* on page 322.
- *Sales by Department and Terminal report* on page 266.
- *Division Sales report* on page 326.
- *Flash Sheet report* on page 272.
- *Group Sheet report* on page 274.
- *Prediction report* on page 331.
- *Site Sales report* on page 334.
- *Smash Sheet report* on page 276.
- *State Sales report* on page 339.
- *Terminal By Sales report*.

Reports by period:

Use these reports to examine sales across departments, divisions, states and sites for a set period.

- *Department Sales by Period report* on page 221.
- *Division Sales by Period report* on page 230.
- *Site Sales by Period report* on page 234.
- *State Sales by Period report* on page 238

Specials and item reports:

Use these reports to examine popular items in various categories such as item types, styles, specials and associated items.

- *Specials Department Sales report* on page 364.
- *Specials Site Sales report* on page 368.
- *Associated Item Sales By Site By Site report*.
- *Associated Items report* on page 246.
- *Transactions Containing Item report* on page 299.
- *Site Item Summary report*.
- *Top 10 Item Sales report* on page 343.
- *Top 10 Item Style Sales report* on page 348.

- *Top 10 Item Type Sales report* on page 353.
- *Top 10 Supplier Item Sales report* on page 358.
- *Top 10 Department Sales By Terminal report* on page 292.
- *Top 10 Special Sales report* on page 372.
- *Top 10 Item Sales report* on page 242.

Franchise reports:

Use these reports to examine the activity of franchises.

- *Consignment Summary Sales report* on page 131.
- *Consignment Sales By Supplier report* on page 135.
- *Franchise Department Sales report* on page 121.
- *Goal Sheet report* on page 128.
- *Franchise Site Sales report* on page 124
- *Data Extraction report* on page 140.
- *Data Extraction report* on page 144.

GST reports:

Use these reports to examine the GST obligations of your company.

- *GST Department Sales report* on page 152.
- *GST Site Sales report* on page 156.
- *GST Balance Position report* on page 149.
- *Top 10 GST Sales report* on page 160.

Point of Sale reports:

use these reports to examine the activity of your Point of Sale and operators.

- *Clerk Sales report* on page 54.
- *Clerk Transactions report* on page 60.
- *Clerk Loyalty Sales report* on page 49.
- *Sales By Tender report* on page 80.
- *Void Sales report* on page 89.
- *Wages / Turnover report* on page 92.
- *Sales Returns report* on page 85.
- *Petty Cash Purchases report* on page 77.
- *POS No Sales report* on page 74.

Managing sales reports

- *Site By Sales Discounts report* on page 66.
- *Discount report* on page 71.

Statistics and audit reports:

Use these reports to examine statistical information about your sales, such as customers' post codes, low value sales, single-item sales and department tenders.

- *Customer Counts report* on page 95.
- *Department Tenders report* on page 101.

Tender Balances report

Use the Tender Balances report to view the balances of tenders and departments for your company. The report balances reported activity against actual activity. For example, reported sales amounts versus the actual tender amounts received.

Note: Some transactions appear as positive or negative adjustments to the balance, to reflect their nature against the reported or actual amounts. For example, a deposit for a customer order appears as a negative-credit, to reflect the fact that it is money received without sales. When the deposit is redeemed when the customer order is paid for, this is reversed.

Opening the Tender Balances report

To open the Tender Balances report:

1. Press  Sales from the main menu.
2. Press Sales Reports >Department Tenders.

The Tender Balances report is displayed.

Department Tenders Report - Location Type [All] : Amounts From 01-Jul-2016 To 30-Jun-2017

Glossary

Account

An account is a general ledger structure that categorises particular kinds of income or expenditure for financial reports.

Advertising label

An advertising label is a large label designed to advertise the price of an item.

Appointment (Scheduler)

An appointment is an entry for a customer in the Scheduler that represents one or more specific services scheduled at a particular time for the customer. It can be retrieved by the Point of Sale and added to a transaction. Appointments can be rescheduled, cancelled or duplicated.

Aged balance

An aged balance is an amount of money owed that has been adjusted to factor an interest rate applied over time. For example: you owe a creditor \$1000, with a 10% interest. You pay \$700, leaving \$300 still to pay. After the interest period elapses, 10% interest is applied to the remaining \$300. Your aged balance is now \$330.

Balance

A balance is the total amount of money owed either by yourself to a creditor, or by a debtor to you. A balance may be:

- Positive, indicating money is owed.
- Zero, indicating no money is owed.
- Negative, indicating the party who owed money has over-paid. For example, if you pay a creditor \$1000 when you only owed \$999, your balance would be -\$1.

Barcode

A barcode is a string of numbers that links to an item. Items can have multiple barcodes assigned to them. Some barcodes called Price Embedded Barcodes encode information such as the quantity, weight or price of the item into the barcode. You can configure different types of price embedded barcodes in the Portal.

Batch (kit manufacture)

When manufacturing kits, a batch identifies a single point in time where a specified number of kits were manufactured together.

Batch (stock take)

When performing a continuous stock take, a batch identifies a collection of items scanned at one time by one or more PDTs.

Brand

A brand is a means of identifying items that belong to the same product line. Items can only have one brand, but items from different suppliers may have the same brand.

Bonus loyalty points

Bonus loyalty points are additional loyalty points accrued for certain activities, such as purchasing particular items, or participating in a promotion. Bonus points are accrued in addition to regular loyalty points.

Bulk discount

A bulk discount is a discount on the purchase price that is offered when a certain number of units or weight of an item is purchased in a single transaction. An item can have different discount amounts depending on the number or amount purchased.

Company

A company represents your organisation within the Portal. A company can have one or more sites, representing physical locations of stores, including online stores. Some Portal configurations and features affect the entire company, other configurations can be specified per site.

Complete Order

A customer order is complete when:

- The order has been fulfilled on the Portal.
- The order has been marked as paid in full on the Portal or the customer has paid the remaining amount on the Point of Sale.
- The order has been collected or delivered.

Contract

A contract is a set of rules dictating the price, quantity and incentives offered by a supplier for a specific item, used by the Portal when calculating the best supplier to purchase a particular quantity of that item. Each contract relates to a single supplier and item, and you can have multiple contracts for each supplier and each item.

Controlled purchase order / Controlled requisition

A controlled purchase order or requisition cannot be finalised until it has been authorised by Head Office.

Cost matrix / price matrix

A cost matrix or price matrix is a means by which the Portal can automatically calculate the price of an item at each price level based on the item's supplier cost. You can create multiple cost levels, so that the price levels of an item that cost \$5 might be calculated very differently from an item that cost \$10.

A price matrix can be:

- Department-based, where all items within a department follow the same cost level rules.
- Supplier-based, where all items from the same supplier follow the same cost level rules.

Only one method can be used. You can also elect to use neither.

Credit adjustment

A credit adjustment adds credit to a balance, decreasing the amount of money owed. For example, if you owed a creditor \$100, a \$10 credit adjustment would mean you owed \$90. Credit adjustments are usually used to correct errors. If you need to decrease money owed due to a refund or return, you should use a credit note instead.

Credit limit

A credit limit is the maximum amount of money a debtor is allowed to owe your organisation at any one time. For example, if a debtor's credit limit is \$1000 and they already owe \$900, they can only go into debt to the value of another \$100.

Credit note

A credit note adds credit to a balance, decreasing the amount of money owed. It is usually created when a balance needs to be adjusted due to a return, refund or rebate.

Creditor

A creditor is an entity to whom your company owes money. They may be a supplier, providing the items your company sells, or they may provide another service, such as a cleaner. The Portal treats suppliers and creditors the same. They have a balance tracking how much you owe them, and a credit limit that determines how much your company is allowed to owe them at a time.

Creditor contract

A creditor contract is an agreement between your company and a creditor or supplier to supply a set quantity of an item at a set price for a set period of time.

Creditor payment

A creditor payment is a Portal record of paying invoices or debit adjustments. More than one invoice or debit adjustment may be paid either partially or in full in a single payment record. Creditor payments are a Portal record only and are not connected to your bank account.

Cross-reference

A cross-reference records the supplier's internal item code for an item to streamline the ordering process. Cross-references can make stock receipting easier, if suppliers use their internal codes on delivery dockets. Cross-references are also required to use the Portal Data Interchange (PDI) feature.

Colour

A colour is one of the three item variation options under Fashion. An item with a designated style may have a colour defined, as well as a size. The terms colour size and style may be renamed for your Portal configuration.

Customer

A customer on the iZen Point of Sale is a person or organisation who purchases items in advance, to be collected or delivered at a later date. Customers may also have debtor accounts, where they are allowed to owe money to your organisation and can pay off that debt via the Point of Sale.

A customer on the Portal is a person who has interacted with your company in some way: they may have signed up for a loyalty member, ordered items from your company, opened a debtor account, requested a quote or has some other kind of interaction that created a customer account with their details in the Portal system. A customer may also be a loyalty member, marketing member or a debtor.

Debtor

A debtor is a customer who has been extended a line of credit by your organisation: they are allowed to owe a certain amount of money (up to their credit limit) to your organisation with the agreement the amount is paid off before a set period of time, which allows them to buy large quantities of goods, or buy items frequently and make payments at a later time. Customer orders that have not yet been collected or completed are not counted as "money owed". Customer accounts are separate from debtor accounts, and not all customers are debtors.

Debtor balance

A debtor balance is the amount a debtor currently owes your organisation. This amount only includes finalised transactions that have been added to the debtor's account for future payment, and does not include orders that have not been completed or collected yet.

Debtor contract

A debtor contract is an agreement between your company and a debtor, where they can purchase a set quantity of an item at a set price for a set period of time.

Debit adjustment

A debit adjustment debits a balance, increasing the amount of money owed. For example, if you owed a creditor \$100, a \$10 debit adjustment would mean you owed \$110. Debit adjustments are usually only used for corrections. If you need to record a charge due to an order of goods or services, you should use an invoice.

Delivery docket

A delivery docket is a type of stock receipt that records the incoming stock without creating a creditor invoice. Delivery dockets cannot record delivery fees or discounts. You can match delivery docket stock receipts to creditor invoices.

Department

A department is a means of categorising items in your inventory. Items can belong to only one department. Depending on your Portal configuration, you may have up to five levels of departments in a hierarchy, by default called Departments, Sub Departments, Categories, Sub Categories and Ranges.

Note: This documentation uses the Portal default names for these levels: Department and Division. Your Portal may be configured to use different names, but the function is the same. You can see the names and levels your Portal uses in the Department Layers tab of Company Maintenance.

Department cost level

A department cost level is a rule used by the Portal to automatically calculate prices for items within a certain cost bracket, according to how much they cost. For example, items below \$5 might be priced at 2 x cost. Items between \$5 and \$10 might be priced at 1.8 x cost.

Department promotion

A department promotion is a promotion that applies to all items within a specific department. A department promotion allows you to provide a discount for the items purchased, either immediately or as a credit voucher. The promotion can be restricted to only provide a discount if a minimum number of items or minimum sale amount is reached.

Discount

A discount is a reduction in the price of an item. Discounts can apply to:

- A selected item, calculated either per-unit or per-line.
- The whole transaction, calculated per-unit or per-line for every item in the transaction.

Note: Some items may have discount maximums. If the discount you select is greater than the maximum discount allowed for the item, the item is only discounted up to its maximum level.

Per-unit discounts can:

- Reduce an item's price by a percentage of the original price. For example, 10% off.
- Reduce an item's price by a flat amount. For example, \$1 off.
- Set the per-unit price to a set amount. For example, \$5 per item.
- Set the price of the item to its cost price plus a set amount.
- Remove the tax of an item.

Per-line discounts can:

- Cap the total price for an item line to a predetermined amount. For example, the line total may be anything up to a maximum of \$10.
- Set the total price for an item line to a predetermined amount. For example, the line total is \$10.

A discount may also prompt the operator for a discount amount.

Note: The item and transaction discounts available and the item discount maximums are configured in the Portal.

Note: Special discounts such as some senior citizens' or disability discounts make an item tax exempt. If a tax exempt discount is applied, the customer must supply their Senior Citizen or Tax Exempt ID during the tender process in order to receive the discount. The Point of Sale displays the discount as if from the normal tax-inclusive price.

Division

Divisions are top-level classifications for departments in your company. The Portal offers two kinds of divisions to support the Oracle financial interfaces: Reporting and Financial. Each department belongs to a single reporting division and a single financial division.

DSD

A DSD is an external supplier that is not part of your company. You may configure different rules and restrictions for direct suppliers than are used for the company warehouse. You can also restrict sites to use only warehouse suppliers and prevent them from ordering from direct suppliers.

Employee

An employee is a member of your company staff that you want to roster on to your staff schedule. Employees may or may not have access to Portal and Point of Sale systems, depending on their privileges and account status.

Fashion

Fashion is the Portal feature that allows you to create variation of items, such as different colours, sizes and styles of the same item. The default labels of colour, size and style can be changed to something that suits your inventory.

Family card

A family card is a loyalty card that is linked to the loyalty cards of other customers who are immediate family members. Family cards may share loyalty points.

Fixture

A fixture is a physical structure or defined area within your site that contains stock. This may include gondolas, counters, refrigerators, back-room receipt trolleys, tables, wall sections or any other area that regularly contains stock on your site. Fixtures are used primarily during stock take.

Frequent shopper item

A frequent shopping item is an item that gives loyalty members additional loyalty rewards for purchasing it.

Gambling machine

A gambling machine is a single, specific machine at a gambling venue, such as a slot machine.

Gambling session

A gambling session is a period of continuous gambling.

Gambling spin

A gambling spin is a single instance of betting, for example betting on one round of a slot machine.

Gambling venue

A gambling venue is a place that provides gambling machines for customers to use. A venue may have multiple gambling machines.

Global price change

A global price change is an instruction to change the price of an item in the future, either at a single site, or across several sites at the same time.

Group promotion

A group promotion is a promotion that applies to all items within a group that you define. A group promotion allows you to provide a free item or a discount for the items purchased, either immediately or as a credit voucher. The promotion can be restricted to only provide a discount if a minimum number of items or minimum sale amount is reached.

Group purchase order

A group purchase order is a purchase order that combines the requisitions from several sites into one purchase order. Stock levels can be allocated to each site during the creation of the order.

GSA card

A GSA (Gambler's Subtle Assist) card is a card that anonymously identifies a gambling customer to the Portal, and helps prevent problem gambling by allowing a customer to set limits to their gambling time, periods and amounts.

Home delivery

Home delivery is a feature that allows customers to order their items online, over a phone or by mail, and have them delivered to their house.

Interest rate

An interest rate dictates the amount of interest that is charged on overdue debts by your company.

Inventory

The inventory is the Portal feature of maintaining all items that you offer for sale in your company.

Invoice

An invoice details an amount owed by an entity such as your company or a debtor, and the goods or services that incurred that cost. An invoice usually details the period of time by which it must be paid.

You can also receipt stock using an invoice. An invoice stock receipt automatically creates an invoice for that creditor in your Portal records, and allows you to record additional information such as delivery fees and discounts.

Inter-branch transfers (IBT)

An inter-branch transfer is a transfer of stock from one site within a company to another.

Item

An item represents a good or service provided by your organisation. Items are added to transactions in order to sell or return them. An item will include information about its:

- Barcode.

Note: An item can have more than one barcode.

- Description.
- Unit of measurement, for example an item may be sold by weight or as individual units.
- Price per unit of measurement.

Items also have additional information stored on the Portal, such as stock on hand, promotions and discount maximums.

Item group

An item group is a group of items created for reporting purposes. For example, items that are frequently sold in an impulse purchase fixture. Items can belong to multiple groups.

Item label

An item label is a label with price and barcode information for that item. It is usually attached to each unit of the item, whereas a shelf label provides a single label to describe all units of that item on the shelf.

Item options

Items can be modified with options to detail the customer's specific request. For example, a coffee order may contain soy milk or extra sugar. The options available for each item must be configured in the Portal.

Item type

An item type is a way of categorising items for reporting purposes. Items can have only one type.

Item variation

An item variation is an item that uses Fashion variations of colour, size and style. The default labels of colour, size and style may be renamed for your Portal configuration.

Jackpot

A jackpot is a prize of loyalty points that accrue over a period from eligible transactions that are awarded to a randomly-selected transaction.

Journal

A journal is a unique code identifying a date, site and terminal for a transaction within the Portal.

Kit

A kit is an item that is made up of several other items in your inventory. The kit item itself does not have a stock-on-hand. Instead, when a kit item is sold, the stock-on-hand of the component items is decreased accordingly.

Label

A label is attached to an item or a nearby fixture and displays information about that item, such as the item's price, best before date and quantity, cooking or nutritional information, or a barcode. Labels can be printed via the Point of Sale.

Layby

A layby is a transaction where a customer commits to purchase a selection of items at a future date. The customer must pay the full balance by the due date or forfeit the items. The site commits to set the items aside for the customer, so they can be collected when the layby is paid in full. Depending on the company policy, laybys may incur additional setup fees, or require the customer to pay a minimum deposit when opening the layby.

Laybys can only be created and paid for through the Point of Sale, and can only be edited or cancelled on the Portal. Layby collection is not recorded.

Loyalty

Loyalty is a system to encourage customers to return to your organisation. For example, by:

- Offering discounts on purchases.
- Offering exclusive promotions.
- Allocating points for each purchase that can be redeemed on future purchases.

Loyalty is configured for your organisation on the Portal.

Loyalty card

A loyalty card is a physical or electronic card that uniquely identifies a customer's loyalty account, and records:

- Contact information.
- Whether the customer wants to be notified of promotions, and which contact method to use.
- The customer's purchases on that card.
- The points balance, if your loyalty is configured to award points.

Loyalty card type

A loyalty card type defines the rules of the loyalty card, such as how they accrue loyalty points, how points can be redeemed, and whether cards can be upgraded or downgraded to other types.

Loyalty department

A loyalty department allows you to control how a department's items accrue loyalty points for customers who purchase them, and how points are redeemed on items in that department.

Loyalty group

A loyalty group is a tool for categorising loyalty members to provide jackpots or rewards, or for reporting purposes. Loyalty members can belong to more than one group, and loyalty groups can contain loyalty members with different card types.

Loyalty points

Loyalty points are accrued by loyalty members for purchasing your company's goods or services. The number of loyalty points a loyalty member receives from a purchase is controlled by the item, the loyalty card, loyalty departments and other settings. Loyalty points can be redeemed to purchase goods, or exchanged for vouchers.

Loyalty voucher

A loyalty voucher is a voucher that can be used to purchase goods or services at your company. It is created by redeeming loyalty points for a specific value.

Ledger

A ledger is a financial category or general ledger grouping that a transaction corresponds to for accounting purposes. For example, Expenses, Staff Salary, etc. The Portal uses a ledger for the Trail Balance Profit report. Your Portal may be configured not to use other ledgers.

Ledger type

A ledger type is a category or grouping of ledgers for accounting and reporting purposes, such as Income or Expenses. Your Portal may be configured not to use ledgers.

Line minimum

A line minimum is the minimum number of different items that must be in a transaction to trigger an effect, such as a promotion. Each unique item in a transaction creates its own line. Multiple units of the same item are recorded on the same line. A line minimum of 3 requires 3 unique items to be purchased.

Mail out

A mail out is a communication sent to your customers via email, SMS or postal mail, with marketing, survey, promotion or other information attached.

Manufactured Kit

A manufactured kit is an item that is made up of several other items in your inventory. The kit item must be manufactured on site before it can be sold, and the stock-on-hand of the kit item is tracked by the Portal. When you manufacture a kit, the stock-on-hand of the component items is decreased and the stock-on-hand of the kit item is increased accordingly.

Marketing member

A marketing member is a customer who has joined your marketing program to receive marketing information. They may or may not be a loyalty member or other customer: the marketing list is maintained separately from the loyalty and customer lists.

Matching

Matching is the process of linking a delivery docket receipt with a creditor invoice you have created in the Portal. Invoice-type stock receipts automatically create a creditor invoice and do not need to be matched.

Menu area

A menu area is a category of items designed to group items into meal types during table service. For example, coffees, mains, desserts. Menu areas control which modifier items can be applied to which prime items.

Modifier item

A modifier item is an item in your inventory that is used to add a modification to another item, such as adding 'soy milk' to a coffee. While modifier items can have costs and add to the price of the item they are modifying, they cannot be sold directly on the Point of Sale.

Offer

An offer is a type of promotion that requires a coupon or code to be presented, and can be configured with a limit on the number redemptions allowed during a certain period. For example, instead of allowing 50% off to every customer, 50% off is only given to the customers who present the offer coupon, or only the first fifty customers who present the offer coupon each day.

Open transaction

An open transaction is a transaction that has not yet been finalised. For example, a creditor invoice that has not been paid.

Operator

An operator is a staff member who uses the Point of Sale to process transactions or manage the cash drawer. Each operator is identified by a unique operator code and password that they use to log into the Point of Sale. Operator codes are unique to each site, but do not have to be unique within a company.

Pack

A pack represents the number of units that an item is supplied in. For example, you may sell cans of soft drink individually, but they are ordered in packs of 24 from the supplier. This is different to a referral, where both the single can and the pack of cans are tracked in the inventory.

Pallet

A pallet is a set of cartons containing items that are grouped together as a specific collection so they can be tracked from supplier through to sale via barcodes. A pallet usually has a special barcode that encodes the number of cartons it contains, while each carton has a special barcode detailing the quantity of items it contains and their expiry dates.

Pallet barcodes may also be linked electronically to the carton barcodes.

Payment terms

Payment terms is the number of days after issuing an invoice that a creditor expects to be paid. Common payment terms are 21, 30, 60 or 90.

PDT

A PDT, or portable data terminal, is a small hand-held device with a touchscreen and an in-built scanner that can interact with the Portal to sell, order or count stock via the PDT software interface. PDTs are registered as terminals for a site, just as full Point of Sale terminals are, and require operators to log in to use them.

PLU group

A Price Look Up (PLU) group is a way of categorising items for reporting.

PLU Loyalty group

A loyalty Price Look Up (PLU) group provides special loyalty rewards to loyalty members when they purchase items in this PLU group.

Portal Data Interchange (PDI)

The Portal Data Interchange (PDI) is a Portal feature that allows two separate companies that both use the AMC Convergent IT Portal to streamline their procurement process by automating the creation of customer orders and stock receipts between the companies.

Permission

A permission is a configuration that determines whether an operator is allowed to perform a specific task. For example, the ability to authorise purchase orders or change employee records may be restricted to certain individuals.

Portal operator

A Portal operator is someone with login credentials to your company's Portal. What a Portal operator can do depends on their permissions. A Portal operator cannot use their Portal login to log into the Point of Sale.

Point of Sale operator

A Point of Sale operator is someone with login credentials to your site's Point of Sale and PDTs. Depending on their permissions, they may have limited access to some Portal functionality through a PDT, but they cannot use their Point of Sale login to log into the Portal.

Point of Sale supervisor

A Point of Sale supervisor is a Point of Sale operator with some additional permissions to do things like authorise changes to the Point of Sale terminal, authorise gift voucher returns, or anything else that your Point of Sale configuration requires a supervisor's authorisation for. Their supervisor status is separate from any Portal permissions they may have. Depending on their permissions, they may have limited access to some Portal functionality through a PDT, but they cannot use their Point of Sale login to log into the Portal.

Point of Sale Transaction

A Point of Sale transaction is an exchange of items, which represent goods or services provided by your organisation, for payment. Transactions include all the relevant information about the exchange, such as:

- The date, time, site and location of the transaction.
- The operator who performed the transaction, and which terminal they used.
- The items purchased or returned and in what quantities.
- The amounts and types of payments provided, including any change or reimbursement provided to the customer or redeemed loyalty points.

Note: Transactions cannot be finalised until they balance. That is, the amount owed by the customer is zero, and any amount that has been overtendered has been issued as change.

- The loyalty number linked to the transaction, if applicable.

You can view what is currently included in the transaction in the Transaction list of the Point of Sale.

Note: In the Portal, a transaction also refers to an exchange of money, such as the payment of a creditor, or a debit adjustment.

Price change

A price change updates the Portal with new prices for each price level of an item. Price changes can only be performed by operators with sufficient Portal privileges.

Price level

The Portal inventory system can store multiple price levels. For example, you may have one price level for retail customers and another for corporate or wholesale customers. The Point of Sale can be configured to use the appropriate price level when a debtor or customer is added to the transaction.

Prime item

A prime item is an item that can be sold normally through your Point of Sale. Most of the items in your inventory are likely to be prime items.

Prize

A prize is an award of loyalty points to one or more random transactions selected from all transactions in a specified period. For example, a prize may be awarded to three transactions every day.

Procurement

The procurement system is the set of Portal features that manage and maintain the act of replenishing your stock levels, including managing creditors, contracts, requisitions, purchase orders, stock receipts, returns, adjustments and stock take.

Promotion

A promotion is a Portal feature which lets you create sophisticated rules to offer discounts, free items or rebates when the customer purchases a particular set of or combination of items. The Portal allows you to create promotions based on departments, suppliers, or your own custom item groups.

Promotion group

A promotion group is a group of items you define that either is used to trigger a promotion, or has the effects of the promotion applied to it. You can use the same group for multiple promotions.

Purchase order

A purchase order is a request to an individual supplier to purchase a set quantity of specific items. Purchase orders can be created manually, automatically created from finalised requisitions, or generated using procurement configurations.

Quote

A quote is an offer for your company to provide a specified good or service to a potential customer for a specified price. A quote is usually only valid for a set period, after which it expires.

Rebate

A rebate is an amount of money offered back to the customer by a supplier as an incentive to purchase. As opposed to a discount, special or promotion, where your company covers the lost profit from the price reduction, the supplier is responsible for reimbursing your company.

Rebate group

A rebate group is a collection of rebate item groups, used to easily control start and end dates of rebates.

Rebate item group

A rebate item group is a collection of rebate items, where each item has its rebate rules defined.

Receipt

A receipt is the printed record of a transaction, including the items, quantities and prices, any loyalty information, the tenders submitted and the operator, the terminal and date the transaction took place at.

Referral

A referral is a connection between two items in your inventory, where one is considered part of the other. For example, if your inventory tracks both individual cans of soft drink and crates of 24 cans, you can use a referral so that purchasing a single can (Selling item) depletes your stock of crates (Stock item) by 1/24th. This is different to using packs, as both individual cans and whole crates of items are tracked in your inventory.

Referred item

A referred item is an item that is depleted by the sale of another item. For example, if your inventory tracks both individual cans of soft drink and crates of 24 cans and sells the cans individually, the referred item is the crate of cans, which is depleted every time an individual can is sold. Referred items are also called Stock items in this documentation.

Requisition

A requisition is a list of items requested by a particular site. Each item is given a requested supplier, and all items are included in a single requisition, even if they are from different suppliers. Finalising a requisition can automatically open a purchase order for the appropriate suppliers. Requisitions from multiple sites may be combined into a group purchase order for a supplier, if your Portal is configured to permit group purchase orders.

Roster

A roster is a schedule of when specific staff members are supposed to work.

Sale minimum

A sale minimum is a minimum transaction amount used to trigger a promotion or other effect. For example, a sale minimum of \$10 requires that at least \$10 of items are purchased in a single transaction.

Scale label

A scale label is an item label for a packaged item sold by weight. It includes the item's weight and the price encoded into the barcode, so the packaged item can be scanned at the Point of Sale without having to be re-weighed.

Selling item

A selling item is an item that uses a referral to track its stock levels on a different item. For example, if your inventory contains both individual cans of soft drink and crates of 24-cans, and your company sells the individual cans but tracks stock of the crates of 24 cans, then the individual can is the selling item.

Size

A size is one of the three item variation options under Fashion. An item with a designated style may have a colour defined, as well as a size. The terms colour size and style may be renamed for your Portal configuration.

Note: This should not be confused with an item's size as defined in the Details tab of Inventory Maintenance, which details how units of an item should be measured and sold.

Shelf label

A shelf label is an item label designed to site on a shelf denoting the price and other information for the item, rather than attaching a label to each unit of the item.

Snap count

A snap count is a record of the stock-on-hand of an item or set of items at the time of the snap count, as tracked by the Portal. Snap counts are used for calculations and reporting.

Special

A special is a temporary reduced price given to a specific item for a period of time. Where a promotion applies to a group of items, a special applies only to an individual item.

Statement

A statement is a record of a debtor or customer's balance, for which an invoice has already been issued.

Stock adjustment / write-off

A stock adjustment is a record of increasing or decreasing an item's stock-on-hand, with a reason. For example, stock was found after stock take, or stock has been damaged.

Stock item

A stock item is an item that is referred to by another item, to track the stock-on-hand. For example, if your inventory contains both individual cans of soft drink and crates of 24-cans, and your company sells the individual cans but tracks stock of the crates of 24 cans, then the crate of 24 cans is the stock item.

Stock on hand

Stock on hand is the number of units of a particular item a site currently has. It is updated automatically by stock receipting, transfers, adjustments and sales, and compared against stock take numbers to determine shrinkage.

Stock receipt

A stock receipt is the process of recording stock incoming from a supplier to a site. Stock receipts record the supplier, date, item and quantities, including any items that were received but not ordered, or items that were listed but not delivered. Stock receipts may use a delivery docket, which is a plain record of incoming stock, or an invoice, which creates a corresponding creditor invoice in the Portal to link with the stock receipt.

Stock return

A stock return is the process of returning stock to a supplier because it is faulty or otherwise unsuitable for sale. Stock returns record the date, item and quantity being returned and the reason for each item being returned.

Stock take

A stock take is the process of counting all units of stock at a particular site to obtain an accurate stock-on-hand level. Stock takes can either be continuous, where stock is counted while the site is still open for trading, or manual, where all stock is counted in a single session while the site is closed for trading.

Style

A style is one of the three item variation options under Fashion. An item with a designated style may have a colour defined, as well as a size. The terms colour size and style may be renamed for your Portal configuration.

Supplier

A supplier is a creditor from whom you purchase items in your inventory.

Supplier promotion

A supplier promotion is a promotion that applies to all items marked as purchased from a specific supplier. A supplier promotion allows you to provide a discount or supplier rebate for the items purchased, either immediately or as a credit voucher. The promotion can be restricted to only provide a discount if a minimum number of items or minimum sale amount is reached.

Survey

A survey is a series of questions posed to customers through marketing mail outs. You can use surveys to create filters for other mailouts or surveys.

Table booking

A table booking is a customer request to be served at a particular table at a specified time, with a specified number of guests.

Table section

A table section is a category of tables, used to differentiate areas of your restaurant on the PDT, and for reporting purposes.

Table service

Table service is the act of serving food or beverages to your customers, either as a take-away service or dine-in service.

Terminal (iZen Point of Sale)

A terminal is the tablet or other device that runs the Point of Sale. Each terminal is connected to the site via the base station, and is identified by a unique terminal number, which is recorded in every transaction made by the terminal.

Tipping

Tipping is a means of engaging your customers by awarding points if they correctly predict which team will win in a series of games.

Tipping game

A tipping game is a single game played between two teams at a tipping venue during a tipping round.

Tipping group

A tipping group is an organisation or sport that supports tipping, such as Australian Rules Football (AFL).

Tipping kiosk

A tipping kiosk is the terminal where tipping members select their game tips.

Tipping round

A tipping round is a group of games that occur over the same period, such as all the games in a single weekend. Tipping rounds are defined by the organisation body that manages the sport.

Tipping team

A tipping team is a player or group of players that perform as a single unit, such as a football team.

Team venue

A tipping venue is a venue or area that a game is played at, such as a stadium.

Transaction line (iZen Point of Sale)

A transaction line is an entry in the Transaction list that contains an item and its quantity. If more than one unit of an item is added to a transaction, the units are grouped into a single line. Actions such as price overrides, voids, discounts or refunds then apply to all units in the line.

A transaction line is an entry in the Transaction list that contains an item and its quantity. If more than one unit of an item is added to a transaction, the units are grouped into a single line. Actions such as price overrides, voids, discounts or refunds then apply to all units in the line.

Rounding	\$0.02
Change	\$4.60

User account

A user account is an account that allows a Portal or Point of Sale operator to log in and access features of the Portal or Point of Sale.

Voucher

A voucher is a card or ticket preloaded with an amount that can be used to pay for purchases or services. Vouchers may or may not be rechargeable, redeemable or require a fee or deposit, depending on the rules detailed in the voucher type.

Voucher mask

A voucher mask defines the pattern that a voucher code must fit to be accepted as that voucher type. You can define the initial digits of the code, and the acceptable length. For example, you can define that gift vouchers must start with 213 and be 13 digits long. Any gift voucher that does not match this pattern is then rejected by the Portal.

Voucher type

A voucher type is a set of rules that control how a voucher operates within your company, including the voucher mask, whether the voucher can be recharged, or requires a deposit amount. Voucher types can have sub-types that follow the same rules, but are differentiated for reporting reasons.

Warehouse

A warehouse is a supplier that represents your company's central warehouse, used when sites order some or all of their inventory from Head Office rather than directly from external suppliers. You may configure different rules and restrictions for warehouse suppliers than are used for direct suppliers. You can also restrict sites to use only warehouse suppliers and prevent them from ordering from direct suppliers.
